OBJECTIVE

Computer Science graduate and Software Engineer with hands-on experience in frontend development using Angular, JavaScript, HTML, CSS, and SQL. Experienced in developing and enhancing production applications and working with API-driven features in a financial domain. Strong foundation in Java, Spring Boot, REST APIs, and full-stack development.

EDUCATION HISTORY

- Bachelor of Computer Science and Technology
Starex University, Gurugram, Haryana (2020-2024) CGPA:8.08
- Java Full Stack Developer Training, Ducat School of AI (2025)

RELEVANT SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, Angular, React, Bootstrap
Backend: Java, Spring Boot, Spring MVC, REST APIs
Database: SQL, MySQL, PostgreSQL
Tools/Other: ZAP

EXPERIENCE

- SOFTWARE DEVELOPER INTERN (PRUTOR.AI) IIT KANPUR OUTREACH CENTER NOIDA 62**
1 Feb 2024 – 1 May 2024 [Certificate Link](#)
In my internship, I worked on the local site, Prutor website as per the company's work, like creating slides using HTML, CSS and making corrections in the Katex code which was not running and also led a team.
- Software Engineer, Aiwize Labs Pvt. Ltd. (November 2025- Present)**
Worked on live projects, developing front-end code based on Figma designs and implementing SQL queries. Contributed to application updates using Angular. Gained experience with zero-code platforms, utilizing company-specific tools such as Natflow and Chanakya for project development.

PROJECT

- BulBul Blossom an E-Commerce WebSite (Oct 2024) [Github Link](#)**
Associated with **Infodart Technologies Ltd.**
An E-commerce website that created according to the client's requirement. This website allows user to explore various products manufactured by the client. This project was taken up by my college friend as freelance work during their internship with the company, and I was a contributor to this project in designing and basic HTML and CSS code.
- Loan Lifecycle Management System (Nov-2025 to April-2026) [Live Link](#)**
Associated with **Aiwize Labs Private Limited**
Worked on a production-grade loan lifecycle platform, contributing primarily to frontend development and database optimization in a financial domain. Developed and integrated API-driven features using Angular to ensure seamless frontend-backend communication. Optimized production-level SQL queries to improve application performance. Actively participated in **UAT** cycles, resolving critical issues and implementing **Change Requests (CRs)** based on evolving business requirements. Delivered feature enhancements and production changes to support stable and continuous platform improvements.
- Customer Onboarding Portal**
Associated with **Aiwize Labs Private Limited**
Contributed to frontend development using Angular, HTML, CSS, and JavaScript, ensuring UI and workflows aligned with Figma designs and BRD requirements. Worked on document processing and OCR-related functionality, resolved UI, functional, and VAPT issues, and prepared patches for UAT releases. Actively resolved UAT issues and implemented changes based on evolving business and client requirements.
